Effective July 9, 2010, MASS DOS received authorization from EPA to administer and enforce the lead safety standards for renovation, repair standard being enforced by EPA in Massachusetts. These amendments, which establish safety standards for renovation, repair and painting work that disturbs lead paint in target housing and child-occupied facilities built before 1978, parallel similar federal EPA requirements that became effective on April 22, 2010 under the "Renovation, Repair and Painting Rule" (RRP Rule), **40 CFR 745.80-92**. The amendments to 454 CMR 22.00 are designed to be as protective of human health and the environment as the federal standard.

Certified Renovators are responsible for documenting the training of their workers. EPA requirements for certification went into effect in April, 2010.

The 8-hour class, exam, and certification, can be completed in one day.

Overview of 8-hour course:

Registration & Introduction (including photo);
Why Should I Be Concerned About Lead Paint?;
Regulations; Before Beginning Work
Contain Dust During Work;
During the Work; Cleaning Activities and Checking Your Work;
Recordkeeping; Training Non-Certified Renovation Workers;
Hands - On Activities / Review / TEST

This course was developed by the U.S. Environmental Protection Agency in collaboration with the Dept. of Housing and Urban Development to train Renovation, Repair, and Painting contractors on how to work safely in housing with lead-based paint and comply with EPA's Renovation, Repair, and Painting (RRP) Rule, and HUD's Lead Safe Housing Rule.

Class Fees:

Based on an anticipated count of 16 – 18 participants, IEE will provide your group a rate of \$156 which is a 20% discount off our public rate of \$195.
